EXPERIENCE

Mindstamp, Palo Alto, CA — *Founder*

March 2017 - PRESENT

Mindstamp is an interactive video application that helps companies engage and qualify their audience by adding notes, questions, and personalization to any video in seconds. I designed, built, and launched Mindstamp as a solo developer using Ruby on Rails, Vue.js, Heroku, and other modern technologies. See how it works: mindstamp.io/demo.

Amazon, San Francisco, CA — *Software Engineer Intern*

May 2015 - August 2015

For my second Amazon internship, my summer project was to bring Prime Music streaming to millions of users on the Amazon.com home page. In 4 months I successfully designed, tested, and launched a solution using Java, HTML, CSS, and Javascript in collaboration with multiple other teams within Amazon. Previously, users had to use a separate application to stream their purchased music.

Amazon, Seattle, Washington — *Software Engineer Intern*

May 2014 - August 2014

As an intern on the Kindle team, I worked with one other intern to bring the popular “Next in Series” feature to millions of Kindle users around the world. Using primarily Java, our work enables users to intelligently discover and purchase the next book of the series they are reading.

EDUCATION

University of Florida, Gainesville, FL — *Bachelor’s of Science, Computer Science*

August 2011 - December 2015

I graduated from the University of Florida’s College of Engineering in 2015 with a B.S. in Computer Science and a minor in Mathematics. Relevant courses include Data Structures & Algorithms, Software Engineering, Object-Oriented Programming, Networking, and more.

SKILLS

Ruby on Rails, VueJS, HTML5, CSS + SCSS, Javascript, Git, Heroku, AWS, RESTful APIs, G Suite, Cloudflare

PERSONAL

Travel I’ve backpacked through 10 countries in the last 2 years, including spending 2.5 months riding a breakdown-prone motorcycle across the length of Vietnam alone.

Athletics After traveling, I worked my way from running 2 miles at a time to finishing the 2017 SF Marathon in under 4 hours.

Music I love music, especially seeing it live. My only tattoo is dedicated to the power that music holds in my life.
